

You're invited

Goat industry development day

What's happening in the goat industry and how can goats add value to your bottom line?

This event will provide you with a round-up of the latest happenings in the industry, what opportunities exist and give you a go at putting your learnings into practice with hands-on activities.

Come along to find out more on:

- how you can use growth rates, genetics and visual selection to drive your profitability
- disease investigation – what to look for to save time and money
- value adding opportunities – what exciting prospects are out there
- NLIS and LPA questions answered – get across your obligations
- population modelling and lifting kid numbers – trends, causes and what you can do
- the financials behind the industry – look at the numbers behind the curtain of your business
- industry expert panel session – get your questions answered by the experts

WHO SHOULD ATTEND

Existing and prospective goat producers, livestock advisors, vets, university students and other industry stakeholders
